POLO-KAL NG RATSTOP DN 110

NO MORE RATS IN THE FLATS

It is the nightmare of every inhabitant: that rats might reach the interior of a house or a flat through downpipes and risers. **POLO-KAL NG Ratstop** positively rules this out. The special conical design prevents rats from getting a hold on the sidewalls and thus entering the living area.

UNBEATABLE ADVANTAGES

- Space-saving and practise-oriented thanks to the asymmetrical design
- No service costs – absolutely maintenance-free
- Say farewell to blocked pipes: no flaps, built-in or moving components within the drainage section
- No electricity required
- 20 years of warranty

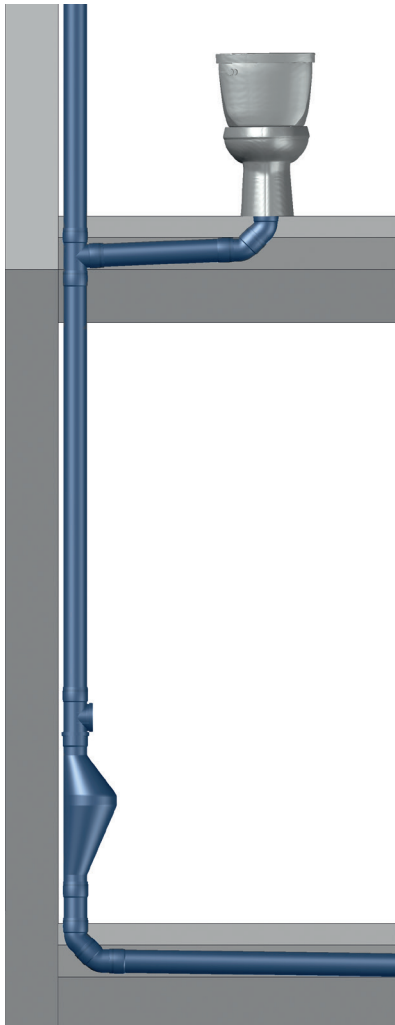

**SOLUTION
MADE FROM
PLASTIC**

POLO-KAL NG RATSTOP DN 110

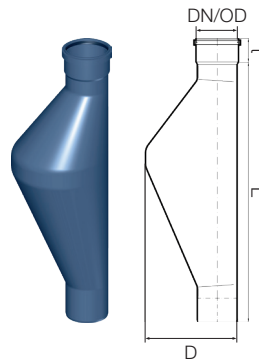

THE CENTRALISED SOLUTION TO GET RID OF UNWANTED GUESTS

POLO-KAL NG Ratstop is the most innovative and space-saving overall solution as no adaptation of the drain or the WC and no connection to the mains is required.
